Please be advised that the County of San Bernardino, Department of Public Health, Division of Environmental Health (LEA) received and approved a Report of Facility Information (RFI) amendment to the Solid Waste Facility Permit for the Heap's Peak Transfer Station. The LEA is certified by the California Integrated Waste Management Board to enforce state laws and regulations at solid waste sites within the County of San Bernardino, including all active and closed landfills.

Description of Project and LEA's Determination

Heap's Peak Transfer Station is located on the north side of State Highway 18, approximately 3.5 miles west of Running Springs and approximately 4 miles east of Lake Arrowhead. The site is located at 29898 State

Highway 18 in Running Springs, California. On October 1, 2008, the LEA received from San Bernardino County, Solid Waste Management Division, a Solid Waste Facility Permit (SWFP) application package to amend the RFI to begin acceptance of e-waste and change the hazardous waste storage time.

The purpose of the change was to update the RFI in order to accurately reflect current operational conditions. The major change was to begin acceptance of e-waste. E-waste refers to CRT televisions, CRT computer monitors, laptop computers with Liquid Crystal Display Universal Waste Electronic Devices (UWEDS) including printers, VCR's, telephones, radios, vacuum cleaners, irons, batteries (not car batteries), fluorescent lamps and tubes.

The LEA finds that the proposed changes are consistent with all applicable certified and/or adopted CEQA documents, is consistent with State Minimum Standards, and does not conflict with the terms and conditions in the current solid waste facilities permit. The LEA approved the amendment on October 31, 2008.
